

The screenshot shows the Databricks workspace interface. On the left, there's a sidebar with various navigation links such as Novo, Espaço de trabalho, Recentes, Catálogo, Jobs e pipelines, Compute, Marketplace, SQL, Editor de SQL, Consultas, Painéis, Genie, Alertas, Histórico de consultas, SQL Warehouse, Data Engineering, Execuções de jobs, Ingestão de dados, IA/ML, Playground, and Experiências. The main area has a search bar at the top. Below it, the 'Workspace' tab is selected, showing the 'Catálogo' section where a table named 'produtos_refinados' is listed under the 'default' schema. A notebook titled 'Notebook sem título 2025-11-10 11:10:37' is open, displaying a single line of Python code:

```
df = spark.table("workspace.default.produtos_refinados") display(df)
```

. Below the code, the resulting DataFrame is shown as a table:
